U.S. Was Warned About Attack 3 Days Before Beirut Explosion

By Philip Taubman

WASHINGTON — Three days before a bomb explosion killed soldiers and sailors in Beirgt, intelligence agencies warned that U.S. forces in Lebanon would probably be the target of a terrorist attack, according to Reagan administra-tion officials.

The intelligence report specified that the group apparently planning an attack was a militant pro-Iranian Shiite Moslem group in Leba-non known as the Islamic Amal and the Party of God, the officials

After the attack Oct. 23, which destroyed the U.S. Marine Corps headquarters at the Beirut airport, U.S. and French intelligence offi-

paratroopers.

In a related development, Lane Bonner, a spokesman for the Federal Bureau of Investigation, said a team of explosives experts from the bureau had been sent to Beirut to help determine who was responsi-

U.S. and French intelligence offi-cials said the group appeared to have been involved.

Mr. Bonner said debris would be brought to Washington for analysis to determine whether the bomb

The number of U.S. deaths from could be interested explosive devices the bombing is uncertain. General used in other stracks in Lebanon. Paul X. Kelley, the commandant of the Marine Corps, said the death predict the exist time, type or tartoll was 239, and spokesmen for the Defense Department and the Marine Corps said 229. M. marine spokesman in Beirut said it was at least 230.

A second bomb attack the same published in a classified intelligence bulletin Oct. 20, the officials paratroopers.

"It was a heads-up, a clear,

"It was a heads-up, a clear, prominent warning," an official who read the report said. He said similar, though less precise, warnings had appeared in intelligence reports earlier in the year. The officials said the report appeared in the National Intelligence Digest, a summary of intelligence

information prepared by the Cenintelligence Agency and dis-tributed daily to 200 senior govern-ment officials, including Marine Corps officers and U.S. military enders in Europe who have specific command over the marine

The adequacy of security procedures and the quality of intelli-gence before the bombing have become major issues in the aftermath of the bombing. Last week, Defense Secretary Caspar W. Weinberger ordered the creation of a board of inquiry to examine the circumstances surrounding the bombing. Intelligence committees in the Senste and the House are investigating the performance of

intelligence agencies.

General Kelley did not see or know of the Oct. 20 intelligence report, according to a marine spokesman, Colonel James L. McManaway. He said General Kelley, who returned to Washington Oct. 19 after an eight-day trip to Europe and the Middle East, worked at his living quarters in Washington on Oct. 20 and did not see the digest because rules governing the handling of the highly classified document stipulate that it not be taken out of more hand. not be taken out of marine headquarters offices in Virginia.

Colonel McManaway said he did not know what the marines did with the specific intelligence report Oct. 20, but he said that in general "our commanders in Beirut get exactly the same information we see here." He said the Oct. 20 report did not contain the kind of precise information that could have helped the marines defend against the

By T.R. Reid

Washington Post Service WASHINGTON — The Senate Appropriations Committee has hearing what the other senators nated from the 1984 military budget a proposal for a Middle East strike force that the Reagan administration had envisioned as a

Committee members emerging from a closed session Tuesday night said Senator Ted Stevens, Republican of Alaska, who had spon-sored the \$220-million classified project at the request of the White House, agreed to withdraw the proposal because of vigorous objections by other senators.

The House, meanwhile, voted

again to move ahead with producion of the MX missile, but did so by just nime votes, 217-208, the closest call yet for the weapon. Voting on the military appropria-tions bill for 1984, the House also defeated an effort to limit produc-

tion of the B-1 bomber.

The strike force with Jordan had been included in a classified portion of the Senate version of the military appropriations. Opponents of the idea chal-

lenged the plan on substantive

grounds, arguing that it could only be an unsettling addition to an already volatile region, and on the procedural point that such a major operation should not be launched For the immediate future, the committee action means the Jordanian strike force is going nowhere in Congress. The House and Senate are scheduled to finish work this week on the military spending bill, the appropriate vehicle for funding

ber's version of the bill includes money for the project.

Senators declined to be quoted about specifics of Tnesday's committee action because the U.S.-Jordanian force remains a military secret even though it has been widely discussed in the media here and in the Middle Past.

the strike force, but neither cham-

Trudeau Plans Emirates Visit

United Press International ABU DHABI — Prime Minister Pierre Elliott Trudeau of Canada is to visit the United Arab Emirates Nov. 30, the official Emirates News Agency said Wednesday, Mr. Trudeau's talks were expected to deal with promoting bilateral relations.

Senator Stevens said: "There tary personnel, to ships, planes, was a \$220-million classified program that I had placed in the bill at the administration's request. After had to say, I agreed to withdraw

that program from the bill." He would not identify the projoint effort of the United States gram. Other committee officials said the U.S.-Jordanian strike force was the only \$220-million classified program - in fact, the only program - scheduled for discussion

Tuesday. The Pentagon has been thinking about arming a quick-reaction force of Jordanians for about four years, but the idea has gained mo-

Shiite Leader Demands U.S. Marines Pull Out Of South Beirut Garrison

By Robert H. Reid

GENEVA - Lebanese leaders headed Wednesday for a showdown over the troop withdrawal pact with Israel while a Shiite Mos-lem leader demanded that U.S. marines leave the garrison in the southern suburbs of Beirut.

Nabih Berri, leader of the Shiite Amal militia and a delegate to the national reconciliation conference in Geneva, said the marines should redeploy to West Beirut or elsewhere because of a "climate of racism" after the Oct. 23 bombing of the U.S. garrison at Beirut airport.

Mr. Berri said that the American public blamed the Shiites for the attacks, which killed almost 300 U.S. and French troops, and that the hostility generated could trigger violence between U.S. troops and Shiites in the airport neighbor-

Some U.S. officials say they believe the attacks were carried out by pro-Iranian Shiite Moslems. "I ask the marines to move from that area to, say, West Beirut or to another place," Mr. Berri said, add-ing that the Italians or English should be deployed in their place.

should leave Lebanou. The call by Mr. Berri came as leaders of the various factions in Lebanon failed to reach agreement on the pact during a day of talks marked by a bomb scare, a walkout by one of the delegates and the temporary refusal of another to enter the botel meeting site.

Ski weeks SF 1350 - (all inclusive) from January 8 to February 4 and March 4 to 11

The Jeading Horels of the World

briefing for reporters, gave no indication that the Syrian-backed group of Lebanese opposition leaders, the Front for National Salvation, had softened its demand to scrap the U.S.-mediated agreement for withdrawal of Israeli invasion forces in return for security and other concessions.

The one-hour afternoon session was delayed for more than an hour after Spleiman Franjieh, a former president, stormed out of the Intercontinental Hotel after refusing to submit to a security search.

A conference spokesman, in a

In Washington, the House of Representatives rejected, 274-153, an attempt to cut off funding for U.S. troops in Lebanon, a move that would have ordered the marine force home in four months and defied President Ronald Reagan's Middle East policy.

The Geneva conference agreed Wednesday on a resolution on the country's "Arab character," but Walid Jumblat, the Druze leader, lest the talks after a dispute over the withdrawal pact with Israel.

Mr. Jumbiat said the resolution reaffirmed Lebanon's obligations as a member of the Arab League. If the marines refused, he said, they He did not spell out those obligations, but Arab League members are forbidden by the organization's regulations from entering into unilateral contacts with Israel.

In May, Lebanon negotiated a pact with Israel under which the İsraelis would withdraw their troops from the country if Syrian and Palestinian forces also left. Syria and Mr. Jumblat want Leba-

non to scrap the agreement. The Central News Agency in Beirut said the delegates agreed to delay discussion of the troop withdrawal agreement until the last item of the conference.

Before the morning session. Swiss police and guard dogs searched rooms in the hotel occupied by Druze delegates after receiving a bomb threat. Druze sources and Western witnesses said no bomb was found.

Security was tight at polling stations in Natal after two nighttime Is Disclosed. explosions in Durban. No one was infured in the blasts, one at a bos depot and the other at a police

It was not clear whether the explosions were connected with the referendum, but the government had warned that black nationalist guernilas of the African National Congress would try to disrupt the voting by violent means.

The proposed new constitution would set up a three-chamber, racially divided parliament of whites, Indians and coloreds, as mixed-race citizens are called. But the changes would continue to exclude the nation's blacks, who make up 70 percent of the population.

The projected changes are modest by international standards, but race is a highly sensitive issue in

Japanese Live With Volcano

(Continued from Page 1) to the sea and then rebuild in the very same place to await the next storm. It is even more than Japanese acceptance of natural disaster, including volcanoes, which are not in short supply. There are 67 considered to be active in Japan, or one-tenth the world total, according to the government.

What motivates the islanders is not that they live on Mivake but rather in Ako, or in Tsubota or in the three other villages scattered across the 34 square miles (88 square kilometers) of ponds and tall grass. A person from Ako would not be happy in Igaya, and so he will stay put and that is that,

residents say.

Not surprisingly, there are rival-ries among the villages. In a bu-reaucratic anomaly, the entire island falls under the jurisdiction of the Tokyo metropolitan government. To keep animosities to minimum, Tokyo rotates its Miyake headquarters from village

The island depends on tourism and some dairy farming for its sur-vival. Its thick woodlands and marshes make a fine habitat for wild birds, and tourists particularly enjoy visiting here in the late spring

Shuichiro Inoue, who heads relief operations for the metropolitan government, estimates damage from the Oct. 3 eruption at nearly \$100 million, with the authorities already having provided more than \$4 million in aid in addition to private contributions.

Even before Oyama erupted once again, younger people had de-cided Miyake was not for them. The population has declined gradually but inexorably since 1962, from more than 7,000 to the pre-

But older people, such as Mr. Kamakawa, have no intention of leaving, although he has also had enough of the mountain's whims. "Probably like all the other changes in society today, these eruptions are coming more and more fre-quently," he said with a laugh as he stood outside the shelter that is his temporary home.

West German Ship Sinks

The Associated Press REYKIAVIK — A West German cargo ship sank in heavy seas Tuesday night 50 miles (80 kilometers) east of the Westman Islands off Iceland's south coast, the Ice-landic Coast Guard reported. A Coast Guard spokesman said the captain and six sailors died and that eight crewmen were rescued.

U.S. Envoy Going to Central America

WASHINGTON (WP) - Richard B. Stone, President Ronald Resgan's special envoy to Central America, will visit the area later this week for further discussions with officials of El Salvador, Guatemala, Hoaduras and Costa Rica about a regional peace proposal, the White House

In discussing Mr. Stone's trip, the White House spokesman, Larry M. Speakes, said Tuesday that Mr. Reagan believed the peace plan being worked on by the so-called Contadora group of Mexico, Venezuela, Panama and Colombia "provides the best basis for a lasting solution to the problems of the region."

That plan calls for barring foreign military advisers from Central America and prohibiting outside support for insurgencies there. The administration increasingly has taken the position that resolution of tensions between the United States and the leftist Sandinist regime in Nicaragna is not merely a bilateral matter but should be addressed within a regional framework such as that offered by the Contadora plan.

Alfonsin Choosing Argentine Cabinet

BUENOS AIRES (Renters) — President-elect Raul Alfonsin was choosing his cabinet and drawing up a series of emergency economic measures with advisers at a ranch outside the capital Wednesday, according to sources in his Radical Civic Union. He was expected to announce his new cabinet early next week, the sources said.

Argenting's ruling military junta met all day Tuesday to consider the results of Sunday's election, military sources said. The armed forces were stunned that the Radicals won 52 percent of the vote, against 40 percent for the Peronists, who had dominated Argentina politics for nearly 40 years, the sources said.

The junta was believed to have discussed advancing the country's return to civilian government from the scheduled transition on Jan. 30. Mr. Alfonsin has called for his government to take over in early December so it can start tackling Argentina's economic crisis.

Israelis Close Bethlehem University

BETHLEHEM (AP) - The Israeli Anny on Wednesday closed the Catholic Bethlehem University and imposed curfews on several West Bank towns and refugee camps after skirmishes between troops and

Curiews were imposed as a preventive measure in Palestinian refugee camps and some other Arab towns to forestall demonstrations on the anniversary of the Balfour Declaration of 1917. The declaration was made by the British foreign secretary, Lord Balfour, and paved the way for the creation of Israel by declaring Britain's support for a Jewish

"national home" in Palestine.

The Israeli military command said the university, which has 1,200 students, would be closed for two months because of the clashes Monday.

Lawyer Meets With Zimbabwe Bishop

HARARE, Zimbabwe (Reuters)—Bishop Abel Muzorewa, the former prime minister arrested Monday in an investigation of subversion, has been allowed to see a lawyer, according to Edward Mazsiwana, secretary-general of the bishop's party, the United African National Council. "I am sick to my heart and deeply depressed," Mr. Mazaiwana said Wednesday. "He could be held for days, or weeks or indefinitely." Under Zimbabwe's emergency laws, a detained person can be held indefinitely

A member of the bishop's family who declined to be identified said he was being held at the high-security Goromonzi jail, 30 kilometers (18.5 miles) east of Harare. Prime Minister Robert Mugabe has accused Bishop Muzorewa of seeking help from Israel and South Africa to overthrow his

Spacelab Launch Advanced to Nov. 28

WASHINGTON (WP) - The National Aeronautics and Space Administration and the European Space Agency agreed Wednesday to carry the \$1.1-billion European Spacelab into orbit on the shuttle Columbia Nov. 28 instead of waiting until February, as previously scheduled.

Some European scientists objected to the change, since three of their experiments will not get much useful information during November and

However, they were outvoted by scientists whose tests will not be affected by the November date. NASA has agreed that the affected experiments will be carried abound a shuttle flight no later than the

Hernu Offers French Military Budget

PARIS (Reuters) — Defense Minister Charles Hernu proposed a 6.7percent increase in military spending Wednesday in a budget of 142 billion francs (about \$17.75 billion) that would create a stronger macker

deterrent and smaller but better-equipped conventional forces. fajor nuclear projects would include completing the submarine inmajor nuclear projects would incince completing the submarine inflexible, due to enter service in 1985, building 16 Mirage 2000N aircraft, and equipping them and other planes with tactical nuclear missiles. Mr. Herm also said a nuclear aircraft carrier, fixed-wing fighters, helicopters, tanks and a new generation of missiles were being designed.

The budget for 1984 proposes cutting manpower by almost 9,000 as a step toward the government's planned reduction of 35,000.

Dates Set for Stockholm Arms Talks

HELSINKI (UPI) — Delegates from 35 nations including the United States and the Soviet Union informally agreed on a timetable Wednesday for the European Disarmament Conference due to start in Stockholm on

In the first clear advance at the three-week Helsinki preparatory meeting, agreement was reached after the Netherlands broadly backed an earlier Swedish proposal for sessions of from 6 to 10 weeks, totaling 32

weeks in the first year, the sources said.

There was no new initiative on linking the Stockholm conference with the 1986 Vienna follow-up meeting on security and cooperation in Europe or on Malta's move to involve nonparticipating Mediterranean nations in Stockholm, they said. But a Western source said the Americans and Russians appeared to agree on the need for a clear link between Stockholm and Vienna.

Vatican Radio Alleges Albania Killings

VATICAN CITY (Renters) — A Roman Catholic prelate in Albania was beaten to death in a concentration camp and dergymen who baptized infants were executed, Vatican Radio said Wednesday.

Pope John Paul has called for prayers by Catholic communities across the world this month "for religious liberty in Albania," which some Vatican officials say carries out the harshest anti-church repression.

Validation officials say carries out the harshest anti-church repression. In a report on religious persecution in the Balkan country, the semiofficial radio said the apostolic administrator of Scutari, the Rev. Ernest Coba, had been beaten to death in a concentration camp about three years ago. A diocesan priest, the Rev. Stephen Kurti, was executed in 1972 for baptizing an infant, while the Rev. Ndoc Luli, principal of a Jesuit college at Scutari, was condemned to death in 1981 for baptizing two children, the radio said.

Iraqi Reports Delivery of French Jets PARIS (AP) — Foreign Minister Tariq Aziz of Iraq was quoted in Thursday's editions of the newspaper Le Matin as confirming that France, has delivered the five Super Etendard fighters which have led Iran to

threaten to close the Gulf oil route.

Defense Minister Charles Herm of France said Wednesday that the planes either are now in Iraq or should be there. "At the time that I am speaking to you, they have been there for nearly a month, or they should be there, and that has not stopped the world from turning." the defenseminister said ...

"France is a country in the habit of honoring its contracts and which keeps its word," he added. "All contracts, whether they were signed by precedent governments or by ourselves, are honored, including that one."

is even announced. TAXI

Walter Miller's meetings went much better than expected and all the details of the contract were settled, formulated and put in writing surprisingly quickly. So what was he to do with all the time left over before his flight home?

If, like him, you're flying on a non-reduced fare, that's no problem. You simply call Swissair and say you want to fly back earlier. The friendly voice at the other end of the line will let you know the earliest connections and reserve your favourite seat straight away.

Complete flexibility when altering travel plans and a free choice of the favourite seat right at the time of booking are, after all, among the privileges of First Class passengers and Swiss Class passengers travelling at the nonreduced fare.

Privileges which Swiss Class travellers paying the full fare also continue to enjoy in the airport and on the aircraft. At an increasing number of Swissair stations you can expect to find separate check-in desks with the "Full Fare" sign. You go on board before anyone else - an altogether more leisurely process - and can put your hand baggage away in peace and quiet. In our DC-10s and B-747s your preferential treatment also means being placed in the front Swiss Class cabin (unless you'd prefer to sit further back). And to ensure you're always recognized as a privileged passenger, you receive a blue boarding pass. Plus, on long-haul routes or between two Swissair European flights to destinations outside Switzerland, a voucher for a free drink in an airport restaurant anywhere on your route.

Finally, a small appeal to all passengers: if you're prompt about cancelling the flight you originally booked, we'll be able to take a booking at short notice from another passenger.

Which may one day be you.

Broad Charges, Lack of Documentation on Grenada Raise Doubts on U.S. Credibility

By Philip Taubman New York Times Service

WASHINGTON - Reagan administration officials acknowledge that, in their effort to rally public support for the invasion of Grenada, they may have damaged the government's credibility by making sweeping charges about Soviet and Cuban influence on the island without so far providing detailed evidence.

Because the administration has not made available documents, a catalog of Soviet weapons found in Grenada or other intelligence information that officials say supports their charges, questions have arisen about the administration statement that the invasion was necessary to prevent a Cuban occupation of Grenada. allies, to Grenada without passing through Similar doubts have been raised about the gov- Cuba. ernment's statement that the invasion was required to prevent leftist forces from holding U.S. citizens hostage.

Acknowledging that such questions are being raised with greater frequency in Congress and in media coverage of the invasion, administration officials said Monday that they were urging the Defense Department and Central Intelligence

Soviet and Cuban role in Grenada.

State Department officials said Monday that U.S. forces had found secret treaties under which Grenadian armed forces would be trained in the Soviet Union and Cuban troops would be integrated into the island's military units.

John R. Hughes, the State Department spokesman, said the treaties also provided for

NEWS ANALYSIS

the shipment of arms directly from other nations, presumably the Soviet Union and its

However, as with previous descriptions of secret Cuban military papers found in Grenada, the Reagan administration did not make the documents public. Mr. Hughes said they may be released soon, after consultation with the Grenadian authorities.

Administration officials said that in general

"I keep telling people to reserve judgment until all the information is in and we can present it to the Congress and public," a senior Defense Department official said.

that our official statements about Cuba's intentions will withstand public scrutiny, but more and more attention is being focused on our credibility rather than on the basic issue of Soviet and Cuban activities." Officials said the problem had been com-

pounded by the administration's decision to bar reporters from traveling to Grenada during the first two days of the invasion, the continuing president dated Oct. 28. restrictions on coverage and almost daily fluctuations in administration estimates of the number of Cuban troops in Grenada.

When the invasion began Oct. 25, administration officials said they believed there were 500 to 600 Cubans in Grenada, 350 of whom were construction workers. Later in the week, the estimate was raised to 1,000, then increased to 1,100, with most described as combat forces. On other officials have said that analysis of the secret documents showing that Cuba planner to

Department officials said the changes were the ple, said Sunday, "It takes a little while to go result of confusion on Grenada.

The credibility problem was underscored by the announcement Monday that President Ronald Reagan's deputy press secretary for foreign He added, "No one here doubts for a second affairs, Les Janka, had resigned Friday, citing damage to his personal credibility as a result of the administration's handling of the Grenada

> "Circumstances surrounding this week's events in the Caribbean have damaged, perhaps irreparably, that credibility," Mr. Janka said. referring to his own reputation in a letter to the

Mr. Reagan's spokesman, Larry M. Speakes, denied Monday that the administration had a credibility problem, saying that in combat situations it was difficult to have the facts in hand in timely fashiou.

Cuban 'Death Threats' Being Checked by U.S.

By Bernard Gwertzman

New York Times Service WASHINGTON - The United States is checking into intelligence reports of "death threats" emanating from Cuba against Americans in Latin America and elsewhere in retaliation for the invasion of Grenada, State Department officials

The officials said Tuesday that they had warned Cuba that it viewed such reports with "the gravest concern."

The reports were based, officials said, on intercepted messages in Cuba that have implied that it may have ordered terrorist acts against Americans because of Grenada. There already have been bomb explosions, which caused no injuries. in Bolivia, Colombia and Puerto Rico, but no official has asserted that these were the work of Cuban

In response to the reports, howembassies and other installations ordering the utmost security to be observed, the officials said. They said diplomatic messages have also been sent to Cuba warning of U.S.

At the State Department, John Hughes, the spokesman, discussed the concern. There are some reagainst Americans in Latin America and elsewhere that emanate from Cuba."

"This is a subject of gravest con-cern to the United States," he said. We are obliged to take reports of possible terrorist activity very seriously indeed, especially under cur- for the move. rent circumstances, and we do."

the "death threats" were genuine. There has been tension between

reporters and sookesmen for several days, ever since President Ronald Reagan and other officials began talking of captured documents and other intelligence information suggesting Soviet and Cuban plans to turn Grenada into a Communist

vastion" in the Caribbean. So far, no documents have been made public, although Mr. Hughes has promised some would be soon.

One official said the new intelligence reports were not interceptions of clear-cut instructions to agents, but conversations suggesting that orders had gone out to take steps against the Americans in the

wake of the attack on Grenada. In another development, a White House official acknowledged that the Reagan administration, in its efforts to preserve secrecy for the Grenada operation, may have made a mistake in not consulting ever, messages have gone to U.S. earlier with Britain and in not consulting other allied nations.

The government of Prime Minister Margaret Thatcher has criti-cized the invasion and said it had been informed only at the last moment, and had counseled against it. Sir Geoffrey Howe, the British foreign secretary, has asserted that he was misled by Washington into ports that there are death threats thinking that the United States would not invade.

Administration officials have been saying that while they have received virtually no public sup-port outside the Caribbean for the invasion, some allied leaders privately have indicated their backing

With the deployment of new Mr. Hughes said: "We are not U.S. missiles about to start in Britgoing to get into communications ain, Italy and West Germany, the we may or may not have had with allied governments have lost an important argument, that the Soviet taken. Finds Sloppy Discipline Among Pilots standards manager for the FAA's of the cockpit, and each pilot oper-Great Lakes Region, which is reated his side as he wished.

By Douglas B. Feaver Washington Past Service

WASHINGTON — A special Federal Aviation Administration investigative team, formed in Type after two in-flight emergencies on Republic Airlines, discovered a pattern among Republic crews of sloppy discipline, poor coordina-tion and "near total noncompliance" with fuel planning proce-

By all accounts, Republic acted quickly to correct those major safety problems, but the findings underline the broader question of why day-to-day FAA surveillance did not discover them.

There has been growing concern among some aviation experts that Reagan administration cuts in FAA inspector ranks are a threat to the industry's safety record.

The concern is heightened by the fact that new airlines are being started up and old ones are being buffeted by financial turbulence in the competitive shakeout after de-

regulation of the industry. In April, a Republic flight from Minneapolis to Phoenix, Arizona, carrying 145 persons, lost power in both engines and descended peril-ously close to mountain peaks before the crew restarted the engines and landed in Las Vegas. The fuel feed had not been switched from one tank to another, something that should have been done before the first tank ran dry.

In May, a Republic jetliner from Fresno, California, to Phoenix with 86 persons aboard lost one engine and almost ran out of fuel before the crew made an emergency landing at a U.S. Air Force base.

The fuel-planning incidents that caused the inquiry "were not isolat-ed events," the FAA found, according to a report obtained by The hington Post under the Free-

"Investigation and interviews determined that there were several other incidents" concerning problems that were caught before they became emergencies, the re-

Because of the investigation, Re-

Great Lakes Region, which is re-sponsible for Minneapolis-based Republic, initiated the investiga-

tion after the second incident. The FAA recommended 21 points to Republic, he said, and all but one, which was unrelated to inflight safety, have been met. Although Republic remains un-

der "continuing special surveil-lance," Mr. MacArthur said he was very definitely" satisfied that Republic now has a safe operation. Republic is a child of deregulation, approved by Congress in 1978. The law made mergers easy, and Republic was created July 1, 1979, when Southern Airlines was

merged into North Central. In October 1980, Republic purchased Hughes Airwest. Thus, in less than a year, three small regional airlines with different crew training histories, differ-

ent management philosophies and different flight procedures were joined to become the nation's ninth largest airline. Republic is now a coast-to-coas

operation serving 150 cities and making about 2,800 takeoffs and landines a day. "We had a very good safety record and our general procedure had been to treat pilots as professionals and expect them to perform

well, and they did," said Mr. May, who came from North Central. The FAA came to the same conclusion. "The overriding observation within the operations area," its report said, "was the failure of the check-airman program to ensure that the highest professional stan-dards are adhered to."

Check airmen are airline em-ployees delegated by the FAA to certify that pilots and co-pilots are properly trained and retrained. uch of FAA's safety regulation, in the operation of airlines and manufacture of planes, is by delegation to company employees.

FAA inspectors watch over airof paperwork and flights. In 1980, the agency was authorized to have 640 airline inspectors; in the 1983 fiscal year, which ended Sept. 30, the authorized number was 534, and the actual number employed in those jobs was 451.

The report about Republic's opcration is an unusually strong document for FAA writers. Its descriptions of problems include the

• Checklists, a key to safe air-...craft operation, were completed from memory and in some cases, "checklist steps were read but, in

 Six crews encountered weather problems with FAA inspectors on board. "When asked the criteria for using anti-ice, only one crew replied correctly.

The inspectors found that conserving fuel - a major cost factor in airline operations -had become of great concern to flight crews. FAA inspectors said that, on most flights they observed, the Republic crews used a fuel-saving technique in approaching airports instead of the "stabilized approach" that safety experts recom-

U.S. Ambassador To U.K. Defends 'Laid-Back' Style

LONDON — The U.S. ambassador, John J. Louis Jr., who was withdrawn from Britain by President Ronald Reagan after two years and dubbed the "invisible man" by the British press, de-fended Wednesday what he called his "laid-back" style in the diplo-

in in the

Marin .

"I think my style has been one of being a bit laid-back," said Mr. Louis, 58, in a British Broadcasting Corp. interview. "And I think that's the kind of style 2 U.S. ambassador here has more or less always tried to portray. We don't push ourselves forward in the society and try to do our serious negotiations and serious relations with your government on a low profile."

His scheduled Nov. 7 departure has been called his resignation by Louis has made it clear that he is leaving against his will, however. He said last month that he was "disappointed" at the prospect of

leaving Britain Mr. Louis's role on substantive matters has been limited, and he was criticized on both sides of the. Atlantic for failing to return from a vacation until 10 days after the start of the Falkland Islands crisis.

He is to be succeeded by the • The majority of crews drew current ambassador to Belgium, an imaginary line down the center Charles H. Price. .

Victim of AIDS in U.S. Linked to Blood Product

By Ronald Sullivan

New York Times Service NEW YORK — A California blood product company has with-drawn 16 lots of a blood clotting factor used by hemophiliaes after it was discovered that it contained plasma drawn from a blood donor in Texas who died last month of acquired immune deficiency syndrome, or AIDS, an official of the Food and Drug Administration

WASHINGTON — President
Ronald Reagan has agreed to renegotiate part of Poland's official foreign debt to the West, a White

House statement said Wednesday. The statement said Mr. Reagan. in a "measured step" to encourage national reconciliation in Poland. had agreed that the United States would join other Western countries in talks on rescheduling \$465 million, mostly in overdue interest payments, owed by the Warsaw

Earlier, in Warsaw, a government official said Poland's leaders would welcome the lifting of U.S. sanctions imposed after the 1981 military crackdown.

"We have said all along we want our relations with the United States to return to normal," said a Polish official, who spoke on condition that he not be identified by name. But there have been so many peace feeiers so far that we will have no comment until the Americans actually take the step."

White House officials had said Tuesday that President Reagan soon would allow resumption of negotiations to reschedule the more than \$16 billion that Poland owes Western governments.

Formal talks on rescheduling Poland's debts to Western countries could resume within days after an U.S. move to ease sanctions. Jerzy Malec, Poland's chief debt negotiator, said Wednesday, Mr. Malec said the Club of Paris, a group of 15 Western creditor governments, was expected to meet within days to discuss rescheduling \$4.5 billion in government-to-government debts lling due this year and last.

Rush of New Uses of Plastics Dims Future of Glass, Metal

By William J. Broad

New York Times Service EW YORK — The revolution in plastics has moved out of the laboratory and into the marketplace — and, according to chemists and entrepreneurs, for many products the days of glass and metal are

Chemists can now rearrange the loops and chains of carbon, oxygen, hydrogen and nitrogen in plas-tics not only to make them lighter, cheaper and better protectors of perishables, but to give them extraordinary properties as well. They can be made to conduct electricity, or to have the strength of

steel.
For consumers, the first rumbles of the revolution can already be eard. A plastic automotive engine has been built, giving better fuel efficiency, and on the horizon are lightweight plastic batteries, fuel cells and paper-thin arrays of solar

cells that can be pulled off a roll. Even the simple toothpaste tube is no longer so simple. Once made of lead, it is now composed of mne layers of plastics and other materials that, among other handy qualities, refuse to break open and ooze toothpaste even after repeated folding. Further signs of the revolution are snack bags and cooking ponches that are impossible to puncture except with a sharp knife or scissors

The upshot was a new family of their electrons - tiny subatomic Union Carbide superplastic, can used for the first time this winter in tubes), coextrusion has recently

Industry experts expect the pace of the shake-up to quicken. "When been considered an indivisible unit you look at costs of production, of nature, the negative electric sius) and has a tensile strength of said, "and much quieter." More-plastic bottle is now used by Heinz com poppers, egg cookers, digital watch cases, camera cases, pace-

makers and astronauts' heimets.

Since the mid-1970s, even stronger (and more expensive) metallike plastics have emerged that can take higher temperatures and stresses. Kevlar, five times stronger than steel, is widely used to make bulletproof vests. The toughest metal-like plastic yet created was recently announced by scientists at E.L. du Pont de Nemours & Co. Known as Delrin ST, for super tough, it will, according to Du Pont officials, find its way into everthing from automotive bearings and bicycle gears to typewriter parts and ski bindings.

Perhaps the epitome of super-toughness is the plastic automotive engine. Matty Holtzberg, a New Jersey inventor who is president of Polimotor Research, said his pat-ented plastic engine, built under plastics. Udel, the brand name of a contract to Ford Motor Co_will be

A bevy of new techniques is shaping the new plastics into useful products. Perhaps the most remarkable is a process known as "barrier coextrusion," in which different polymers, each with a unique quality, are bound together into a single sheet that performs multiple tasks such as blocking the passage of light, oxygen and flavor. An example is a potato chip bag, seemingly impervious to puncture. Its inner and outer layers block light. moisture and large chemicals, while a middle layer blocks the migration of molecules such as oxygen. The final two layers tie the whole thing together. High tensile strength is a byproduct of the five-layer sand-

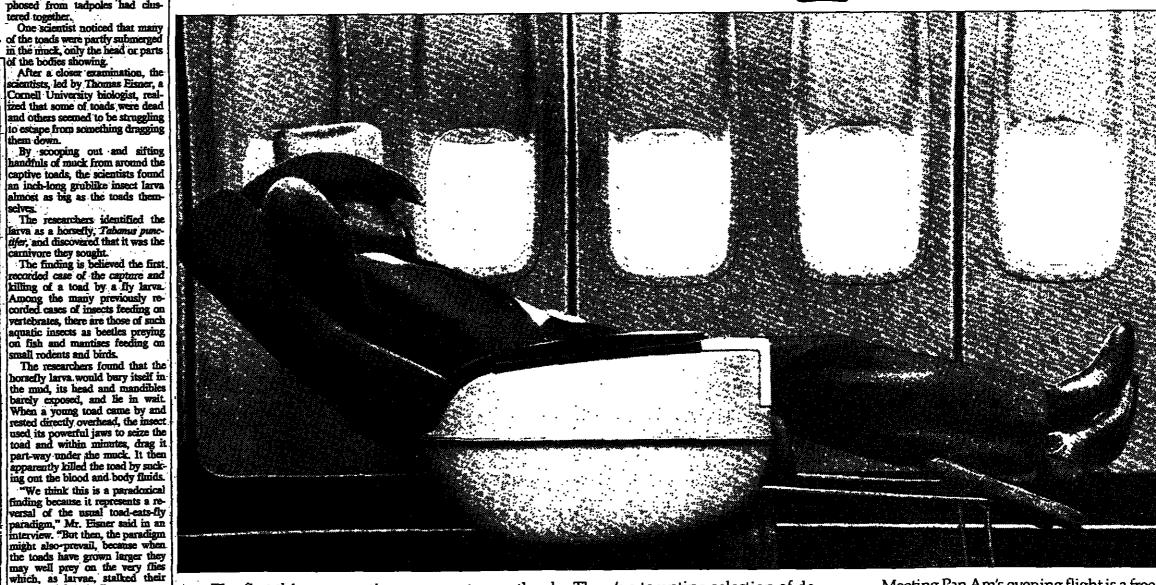

American Can Co. of Greenwich, Connecticut, says these products weigh less, work better and are cheaper than metal-foil counterparts. At first limited to films (such

Coextrusion is also extending the shelf life of perishables. Containers of Capri Sun, for example, a widely distributed brand of fruit drink in a flexible plastic and metal package, are first sterilized by a blast of bot steam, then filled with fruit drink at a temperature of 195 degrees. After sealing, they have a shell life of more than a year.

Steel-like plastic is easy to make - but expensive. Greater demand will drive down the price, a trend clearly at work in the automotive industry, especially in fuel-conscious Europe. The amount of plastic in the typical European car has risen to almost 7 percent by weight, some models having as much as 10 percent plastic.

A problem in all this is recycling. With cars, for example, about 70 percent of their weight (mostly metal) can be recycled - but not plastic parts, a problem currently A pioneer of coextrusion, the molding bumpers, gas tanks, and merican Can Co. of Greenwich, roofs, said Nicholas Pappas, Du Pont's vice president for polymer producis. "Actual products are a couple years down the road, but one of the things we're going to as the ones curled into toothpaste bring to the party is the ability to

Pan Am. You Can't Beat The Experience:

A Pathetic Little War

seem strangely ambivalent about the Grenada trip. They feel simultaneously good and un-easy, finally discerning the administration's misstatements and misperceptions but nonetheless inclined to find value in the enterprise.

Some people still cling to the varn that an invasion was needed to rescue a few hundred medical students, even as it turns out they were more frightened by the invasion than by anything they experienced before. The national ambivalence begins right there. Sitting in his smashed-up office, Dr. Geoffrey Bourne, the school's vice chancellor, said, "From the point of view of saving our students the invasion was unnecessary — though in political terms it was a very good thing."

How so? When President Reagan launched the invasion, he cited the "urgent request" of nearby islanders who feared that Grenada's "leftist thugs" would begin terrorizing the neighborhood. But whatever their alarm, their request was plainly encouraged, if not indeed written, in Washington.

Restoring democracy in Grenada sounds like a better mission still. But then why only in Grenada? Why not also in Haiti, or Chile? So what was eating Washington? As the

president finally conceded, it was all those Cubans in Grenada, building a suspect airfield, perhaps to "export terror." But where was the evidence to support that justification? In fact, there was more ignorance than evidence. Our troops carried tourist maps of the island; they were pathetically underinformed. If the arms they now are uncrating turn out to be more than Grenadians could ever need, no such evidence was available when they

What, in any case, could Cubans have done from Grenada that they cannot do better from Cuba? Physically, little more than complicate the tasks of American intelligence.

It was psychologically that the Cubans got

A week has passed and most Americans to us, exposing a deep-down sense of American inadequacy and weakness. Would not the "loss" of even tiny Grenada make the Commies look stronger and again expose democrats as feeble and timid? Would it not prove that a few radicals can snatch a society from under Uncle Sam's nose, and with Cuba's help put themselves beyond his reach? Would not the world conclude that they are the wave of the future? For once, let's show 'em.

> After all is said and done, the real inspiration and justification for the Grenada invasion lies in those false feelings of impotence fanned by years of deceptive politicking about American retreats, defeats and even nuclear inferiority. And the inevitable corollary of impotence is envy: envy of the Russians' presumed advantage in operating freely across frontiers, exploiting the openness of democracy without a Congress or press or public to restrain them. It may be too late to invade Cuba, or Nicaragua, but Grenada will reverse the tide: two can play at this game.

> The President Feelgood who prescribes such heady pills can momentarily get away with all kinds of diagnoses. It has not yet sunk in that the Grenada high will wear off and leave the world essentially unchanged. Indeed, the world will be unimpressed with such a fly-swat 'victory" - if not, worse, distillusioned about the maturity with which Americans manage their enormous power.

> As Soviet history shows, the worst thing about a national inferiority complex is that it induces conduct that really is inferior. Delusion, deception, secrecy and lawlessness are not the American game — not just because Americans preach a superior code but because they actually live by it. Sooner or later we will tell ourselves and the world the truth about Grenada. Having made a pathetic little war because we felt had will not, finally, make

- THE NEW YORK TIMES.

Going to Bed Hungry

Heritage Foundation, hungry people in America have only themselves to blame. Food aid programs do not work, says the author, James Bovard, because many families "fail to budget properly." He suggests that, rather than food stamps, "vitamin pills and soup kitchens" might be more suitable forms of aid.

Of course, having 34 million poor people line up every day for rations might prove to be something of a logistical problem. At the very least, the queues would impede downtown traffic. The long lines might also send the average commuter home with the uncomfortable feeling that all is not well in the land of plenty. Nor will a return to subsistence farming — Mr. Bovard blames agricultural mechanization, induced by the minimum wage, for much of the poverty problem — commend itself to many as a desirable course for U.S. economic and social development.

Still, it is worth inquiring whether, despite federal food programs, some Americans go to bed hungry. One piece of evidence is that lines at soup kitchens and other emergency food centers are long and growing. Many studies, including one by the General Accounting Office, attest to that fact. But, the Agriculture Department responds, the people waiting patiently for food handouts are not necessarily "in need." They might just be passing the time.

Representative Leon Panetta's nutrition subcommittee recently heard testimony relevant to this point. A survey conducted last summer in New York state found that most people showing up at emergency centers, health clinics and government offices are consuming far fewer calories than recommended by the National Academy of Sciences. Note that we are not talking about vitamins, pro-teins and minerals — just basic energy-producing calories.

The medical students who conducted this scientifically designed survey also found that, contrary to Mr. Bovard's surmise, emergency food program clients are not frittering away their cash on inessentials. Those sampled reported spending almost 70 percent of their money on food. The problem is that many people simply do not have enough money to supplement food stamps, as the law assumes they will, let alone cover other basic needs.

President Reagan wrote in a recent memo that "if even one American child is forced to go to bed hungry at night . . . that is a national tragedy." Well, nearly 20 percent of the parents surveyed said they sometimes send their children to bed hungry. The president might keen that in mind when he reviews the new plans for food stamp cuts that his Agriculture Department is now preparing.

- THE WASHINGTON POST.

Other Opinion

Grenada's Democratic Future

The events leading to the foreign intervention are still not entirely clear, but it is certain that Sir Paul Scoon, the representative of the British Crown, played a central part in mobihizing outside help against the Grenadian coup leader, General Hudson Austin, in response to alarms by governments of several East Caribbean states. The sanest decision Prime Minister Thatcher can take is to leave the matter of free and fair elections - and the question of a peace force to police Grenada until then - to the Commonwealth Secretariat.

— The Hindustan Times (New Delhi).

A Draft and War After '84?

President Reagan will try to reinstitute the draft in early 1985. By then the U.S. military will simply need more bodies than it has to implement new policies mandated by the Reagan administration's view of the world.

After November 1984, Mr. Reagan, re-elected or retiring, will try to orchestrate a new military buildup. That buildup will include a draft, because paying an all-volunteer army would be too expensive, even if enough men were willing to volunteer.

If that buildup is successful and Washington's war fever can be sustained and transmi ted to the rest of the country, it is hard to imagine that we will not be in a war if there is a second Reagan administration. This time, probably, the war will be with a country that can fight back - facing Cubans and local nationals somewhere in Latin America, or being drawn into the Israel-Syria war that may have become inevitable when the Israelis invaded Lebanon.

— Syndicated columnist Richard Reeves

Andropov's Punishing Pace

President Andropov has recently canceled several public engagements because of ill health. The punishing pace he set himself when he succeeded Mr. Brezhnev has not slowed, and whether he surveys the past 12 months or looks to the future he can have little reason for satisfaction. If it is to continue with its arms buildup, the Soviet Union must improve its economic performance. To succeed in extricating the Soviet Union from its growing difficulties. [Mr. Andropov] needs time and energy. but he seems to be running short of both.

- The Times (London).

FROM OUR NOV. 3 PAGES, 75 AND 50 YEARS AGO

1908: A Balzacian Line of Defense PARIS — There is a quaint old house and mossy old garden in the Rue Raynouard which is to become a new literary shrine. The Society of the Home of Balzac has recently opened as a museum the house where Balzac lived from 1842 to 1848. No. 47 Rue Raynouard is associated with Balzac's most tempestuous and embittered period, and it is related that the house was chosen by the novelist with particular regard for its adaptability to his necessities not so much because the rent was low as because it was perfectly situated and constructed for defense against the army of creditors who pursued him in those days. It was at No. 66 Rue Raynouard, the French say, that Benjamin Franklin made his first experiments with the lightning rod.

The Lid Couldn't Be Kept on Grenada

WASHINGTON — You al-ways know that presidents and reporters here are in trouble when they start to blame and fuss with one another about their anxieties. Nothing hurts them both more than the truth.

Their latest conflict was over the invasion of Grenada. Reporters and television cameras were kept out in the reasonable belief that if the American people knew and saw what gunships do in such an invasion, they might not approve.

Also, the Justice Department, or some parts of it, have been arguing for an anti-leak law, under which government officials would be subjected to random lie-detector tests and official censorship of whatever they might say or write for the rest

There are safeguards against such nonsense, none of them because reporters are popular. The United States is a very gabby country. Nobody can make its people shut up, or interfere with their freedom no matter how awkward or

This is a practical problem. If the White House conceals its invasion of Grenada and deceives even its own press officers in order to conthe reporters, at least one of them will resign and spill the beans.

When the Marines come back from Grenada, some of them will tell that they were wounded by the accidental machine-gun fire of their own buddies and tell the sad story of how a civilian mental hospital was bombed. There is no way to suppress the

truth over a long time in a democracy. The country editors in the small towns talk to the mothers and fathers of the dead and wounded, and the facts emerge.

There are other reasons why a bother Mr. Reagan. He brushes it

By James Reston

policy of concealment fails. The world is too much mixed up now to suppress the truth. When more than 200 U.S. Marines are murdered in the night in Beirut, Congress has the power to call the Marine commandant and ask him why the security was so slack.

When the commandant tells them there is no way to guard against a suicide truck, they want to know then why the Marines are still there and what would happen if another hostile bomb squad or suiwarships off of Lebanon.

In addition, the United States is not alone in these combat zones. Grenada was, not so long ago, a British colony, and the French still regard Lebanon as part of their cultural, if not imperial, history. They have embassies there and all Central and South America, and have something to say privately about the conduct and wisdom of Mr. Reagan's policies.

Mr. Reagan is clearly puzzled and saddened by their doubts. Having supported Prime Minister Mar-garet Thatcher in her military invasion to defend democracy in the Falkland Islands, he simply does not understand why the British leader should oppose his invasion of Grenada. He is equally haffled by the mas-

sive demonstrations in Britain and West Germany against emplacing new U.S. nuclear cruise and Pershing-2 missiles in Europe, espe-cially since this was originally requested by the West European countries, whose people are now objecting to it.
But all this does not seem to

tively exert political control for the

this century) over 750,000 Shia Mos-

lems living in the south — a popula-tion that is daily more vulnerable to

pro-Khomemi influences? What we

really mean when we talk about parti-

tion is a state controlled by Syria, which is allied with the Soviet Union.

But why should this situation nec-

essarily bring about a war between

Syria and Israel? The argument that

Syria — finally reassured that Leba-non has returned to its sphere of

influence - will be willing to temper

its winning political drive into Leba-

non, and arrive at a modus vivendi

with Israel, has all the markings of

misplaced American optimism. The

question is not what the Syrians have

to gain by engaging the Israelis in battle but what they would lose.

No doubt Svria would again suffer

heavy losses, particularly in the air. But its military capabilities should

not be discounted, and may well be

sufficient to allow it to do battle with

Israel for a number of weeks. As the

Israelis learned during their 1982

Lebanon campaign, Syrian perfor-

all off with a smile and a wave of the hand. When the press complained that the reporters were not. getting into Grenada, he said, a little late, let them in. When the Congress complained that they did not know what was going on in Lebanon, he said, give them planes and let them see for themselves.

When he was asked about intimidating his own officials with random lie-detector tests and insisting that they submit to censorship on their speeches and writings, he did not deny it, but obviously had never heard of or even thought about it.

This is not all that new. All recent presidents have wanted to put all their good deeds on the record and on television, and have insisted on discussing their blunders on "background," meaning they could not be identified or quoted, or "off the record," meaning that nothing they said could be reported.

Mr. Reagan is a genius at reading speeches about the glory of Grenada and the tragedy of the Marines in Lebanon. He just does not want to be questioned about it in news conferences, which he holds every few months and statters through with his mystifying clarifications.

But in a funny way, the old dem-ocratic fog works. As Winston Churchill said, it is the worst of all political systems except all those other systems. It was probably incould systems. It was proparty in-evitable that Mr. Reagan, with all his troubles, would begin to blame the press, and that the press would begin to insist that Mr. Reagan would prove "nice guys finish last." We will see about that when all this is debated in the coming presi-dential election, but meanwhile

Change Under Andropov: The Earmarks of a Purge

By Leopold Unger

ing away with much of the governpersonnel he inherited from Leonid

Despite his own fragile health, Mr. Andropov has managed to remove what Western observers estimate to be 10 percent of the mid-level officials of the Communist Party and the Soviet state. At the same time, nearly have lost their jobs.

Mr. Brezhnev, during his 18 years in power, gave the Nomenklatura a feeling of security in their jobs, almost a sense of hereditary privilege. But under Mr. Andropov there is a climate of uncertainty. He has tripled the rate of "retirements." Government ministers have been dismissed or demoted, while regional party committees — panels just below the level of the Central Committee have been criticized openly for "ideological insufficiency.

Mr. Andropov took up Mr. Brezhnev's mantle vowing reforms but no purges. Now, much evidence points to the opposite. True, some reforms have been or will be undertaken. The most important of these has been scheduled for Jan. I and will involve five ministers. It is expected to improve government management and worker productivity.

This is reminiscent of reform proposals announced in 1965 and 1979. Now, as then, the risk is great of seeing the reform effectively sabotaged by the nation's bureaucracy, which remains bulky, conservative

and largely corrupt.

This may explain Mr. Andropov's approach. With the aid of the KGB the only institution in which he has full confidence, since his own appointees hold the organization's key posts - Mr. Andropov has launched a purge before approaching his campaign of reforms.

Logically, the purge began with the all-powerful Central Committee and with the Interior Ministry, which controls the police.

Two of his first decisions are particularly significant. The first was to reduce the power of Konstantin Chemenko, his old rival and long a close friend of Mr. Brezhnev. Mr. Chemenko, who had been considered the regime's No. 2 man, has been "released" from his responsibilities as head of the General Department of the Central Committee.

General Vitaly Fedorchuk, who succeeded him as KGB director, to be minister of the interior.

The reason for this twin operation has become clear. In the last 11

BRUSSELS — Slowly and dismonths, six powerful heads of de partments at the Central Commune moved. Six deputy ministers of the interior were fired or have lost their powers. One of them, General Yugar Churbanov, Mr. Brezhnev's son-in-law, was sent off to Murmansk.

Myths That Distort the First World's View of Third World Debt

SAO PAULO — The foreign debt crisis of the developing countries is the Vietnam of the international financial system. Both the debt crisis and the Viet-

nam War arose from the same basic error: a belief that it is possible to change the course of developing countries' history with a little help from developed friends - even if this change of course is not exactly what the people in those countries want. Since the early 1950s, the developed world has believed in a set of myths that supposedly can help regenerate countries. First is faith in niraculous economic indexes. Brazil, Argentina and India learned fast to produce tons of statistics every year some with rosy figures, others with somber forecasts - to fit any need. In the 1970s, encouraged by the performance of Brazil's a erage growth rate, 10 percent a year, the banking community gave it several loans.

Since the growth of a gross national product is a kind of bible to believers of the pan-financial religion, it would have been in poor taste to remind the lending banks that at that very time São Paulo, a megalopolis thriving on the plessed GNP, was plagued by a meningitis epidemic. Why shed doubts on the optimistic figures, and why shed light on darker curves - like the infant-mortality rate, which, at that time, reached record beights - if it was widely believed that children could be saved from death by a miracle of the GNP? A second myth is that analogies between countries work. Consider the theory of the economic takeoff in developing countries. It holds that if

tion, plus solid GNP growth, takeoff inevitably will occur. It sounds nice but does not always work that way, Brazil accumulated capital, boasted an impressive GNP, but, instead of

the economy taking off, the country developed a \$90-billion foreign debt. The banking community believed in another myth — that an enlightened native elite might solve most problems. According to that fantasy, all would be simpler in developing countries if, instead of political disputes and elections, there were more vernments with a team of the best and toughest in command, acting freely to bring about progress. The international order based on

the flow of money to governments

Regarding "America's Strident New oce" (IHT, Sept. 2) by William Voice Pfaff: ther surprises nor distresses me.

By Elio Gaspari

ruled by military officers with medals and civilian technocrats with doctorares - and committed basically to GNP growth — failed. It collapsed for the same reason that the Vietnam venture did: the association (through sophisticated disguises) with dictatorial regimes. Strong regimes, it was believed, were a good remedy for the indolent people of the Third World. In the end, the dictatorships harmed not only the countries themselves but also the bankers who gave them loans. Instead of producing economic stability, they created social instability and a global foreign debt of \$500

Over the last decade, the American public has not perceived the scope of

an important political phenomenon in Latin America: Brazil's gradual political democratization. It is understandable that the United States worries about what is happening in Central America, but if one considers that El Salvador's gross national product is smaller than the deficit in Brazil's social security program, one may wonder whether the scope of

Today, Brazil is called the "world's biggest debtor." Not long ago, the "Brazilian miracle" was being praised. Soon, Brazil may be singled out as the "biggest default in finan-cial history." Those superlatives mean little. What matters in Brazil is York Times.

the purge, according to:

They rushed out ahead of the herd in last year's bull market rally, and some are still surging. But utility stocks have had a statistic the KGB in June; few nuclear-related sumbling blocks thrown in their path that damaged chalcing was repositions high yields choiciers was expelled the long-distance outlook for some companies while providing high yields are companies of the long-distance outlook for some companies while providing high yields are companies of the long-distance outlook for some companies while providing high yields are companies.

en Mr. Andropol. One tion have brightened the horizon for a selected few in this group.

stable to lower interest

for some utility stocks.

Evan Silverstein, an analyst with L.F. Rothschun, Unicious Steelsein, and analyst with L.F. Rothschun, and analyst with L.F. R temendously in the operation area," be said. "This helps find area," be said. "This helps find costs come down, which creates a cost come down, which creates a cost costs come down. Analysts are saying that better environment to get rate in-

be used on the see of write 3gg on a direct impact on earnings, they have helped cash flow he went on, While these factors have not had attended of the uniting of sidding that "capital expenditures have reached a peak and are on their way down and companies of the state chief the completing programs aren't com-

mitting to new ones." The companies that he labels "first-tier" are Consolidated Edison, Florida Power & Light and Wisconsin Power. He says their rate increase meeds should be modest and in line with inflation or slightly lower. These stocks offer yields of about 81/2 percent.

Utility stocks are a barometer for the entire market because they combine expectations for the credit market with those for the stock market. In the credit market they are looked upon as bond substitutes because they are a conservative investment with relatively stable earnings. Also, their yields are subject to government regulations, and they are basically a monopoly, lacking the risk associated with competition.

Investors Showing Interest

see cle - - - slum The yields they offer tend to be compared with bond market rates in investment decision-making. With interest rates having climbed for several years, utilities had to raise their yields. This pulled down the price of the stocks to lackinster levels. However, with expectations of declining interest rates, utility stock yields are regaining investor interest, according

Now utility stocks are moving to a 10-year high, as indicated by the Dow Jones utility average, and they firmed in the last three months while the general stock market was weak. The rise in the utility average would seem to indicate that interest rates could be going lower and that inflation will not be picking up very fast, analysts said

One follower of utility stocks is John D. Rooney Jr., an analyst with Moseley, Hallgarten, Estabrook & Weeden Inc. In his autumn 1983 apdate, Mr. Rooney says that utilities came out of the long bear market, which began in 1965, in 1981 and the recovery followed. Now, he adds, "we expect the progress to continue but at a slower rate, with a great deal

Mr. Rooney says that utility stock price movements "will be governed by inflation, long-term interest rates, the magnitude of construction programs, and the ability to earn the equity returns permitted by regulators." His scenario calls for "inflation to be in the 4-percent to 6percent range in 1984-86, and on that basis we look for some further decline in long-term interest rates over the next three years."

Cash Generation Increased

He adds that "conservation of energy in the late 1970s has decreased the demand for electricity and reduced the need for plant construction; this factor; compled with the higher returns on equity earned by the industry, has greatly increased internal cash generation." Therefore, he

believes that there is less need for outside financing.

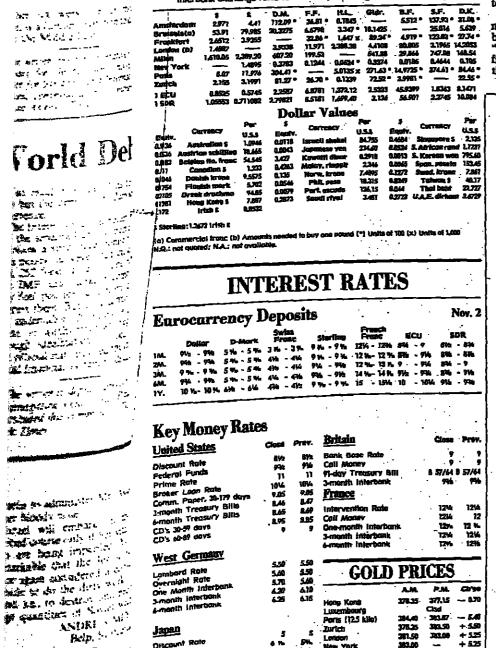

But Mr. Rooney cautious that "the biggest problem in the electrical power indostry is the construction of nuclear power plants." He says that, while "nuclear power has proven to be efficient and economical," the cost of building the plants "has escalated enormously." He adds that, while some of the problems such as inflation and interest rates that contributed to the cost overruns are more manageable, the remaining problems of environmental opposition and new safety regulations "are still resulting

For above-average total return and above average dividend growth Mr. Rooney recommends Central & Southwest, Consolidated Edison, Entex inc., Kansas Power & Light and Southern Indiana Gas & Electric.

Mr. Silverstein of L.F. Rothschild believes that there is a second tier of utility stocks, with yields of about 10 percent, that are poised to move up.
"These companies still have large construction programs, but they don't have the major nuclear problems that have caused uncertainty in the investor community, he says. In this category he lists Commonweath Edison, Southern California Edison, Teco Energy, Southern Co., Northeast Utilities and Carolina Power & Light.

Interbonk exchange rates for Nov. 2, excluding bank service charges

In Germany

By John Tagliabue New York Times Sernce

BONN - West German banks, in an imusual rescue operation, on Wednesday bailed out Schröder, Münchmeyer. Hengst & Co., or SMH, a leading private bank that has been shaken by losses at nonbanking companies it partly owns.

The trouble at SMH, one of Germany's most prestigious private banks and a leading international stockbroker, caused share prices, particularly of banks, to tumble on he Frankfurt exchange, and sparked widespread speculation over the source of the trouble.

rates and inflation have West Germany's bank supervisors, in a statement, said a group of brightened the horizon SMH's creditor banks agreed at a meeting Tuesday at the Bundesbank in Frankfurt to convert outstanding loans to SMH into liable capital shares in the bank, after SMH officials told the group that losses among non-banking companies it partly owns could have "possible negative consequences" for its banking operations.

According to the statement, the banks agreed that the non-banking problems "must not affect banking

An official at the Association of German Banks in Cologne, said a special deposit insurance bank, established by German banks after the collapse in 1974 of Bankhaus LD. Herstatt, had also "agreed in principle" to a loan to SMH using as collateral funds in the banks' deposit insurance fund. Sources said that about 20

banks, led by Germany's largest banks, Deutsche Bank and Dresdner Bank, attended the meeting, which lasted until early Wednesday morning. Though no figures were released, some bank officials said the loans

involved totaled about 200 million Deutsche marks (about \$75 million). But an official at SMH called that figure "far too low." News of the bank's troubles

caused prices to plummet on the Frankfurt stock exchange, which has been remarkably bullish in recent months as West Germany's economy has shown signs of a mild

upswing.

NEW YORK (Reuters) — American Brands Inc. has agreed to acquire Southland Life Insurance Co. from Southland Financial Corp. for \$352 million, American Brands and Southland Financial reported Wednesday. Southland Life has \$8.7 billion of insurance policies in effect, principally in the Southland Life has \$8.7 billion of insurance policies in effect, principally in the Southland Life has \$8.7 billion of insurance policies. pally in the Southern United States.

hich will continue to be the headquarters of Southland Life.

Financial will use proceeds from the transaction to reduce debt.

The new agreement replaces an October 1981 agreement that limited

Gold Fields to a 26-percent interest in Newmont.

Mr. Agnew said, "Newmont represents a very satisfactory long-term investment for Gold Fields. It broadens and diversifies our participation in the United States and complements our exploration-based expansion

years and is priced at ¼ percentage point over the market mean of the three-month London interbank offered bid and offer rates.

The country decided on the note issue, its second in a month, because of favorable market conditions, the bankers said. An undisclosed amount of the £100 million will be used to refinance existing borrowings, they

In September WASHINGTON - Factory orders in the United States climbed percent in September despite backs for machinery, metals and fleet of inexpensive Japanese imthe auto industry, the Commerce

Department said Wednesday. It was the eighth overall im-rovement in the last 10 months, largely fueled by consumer pur-chases of nondurable items from

food to clothing. The increase in new orders in September should help keep (actory production and employment growing in the weeks and months

At a seasonally adjusted \$181 billion in September, a record high, 1.68 million units. factory orders are 18.8 percent ahead of a year earlier. Before seasonal adjustment the increase was

8.9 percent. The recession pulled orders own to a low of \$152.4 billion in October 1982.

Nondurable orders were up 2 percent while durables orders climbed a revised 1.1 percent, in-stead of the 0.5-percent decline re-ported in an advance measurement

Auto industry orders slipped 12.5 percent from August to Sep-tember while primary metals orders were down 0.2 percent

But construction materials orders were up 2.7 percent, consumer staples were up 1.2 percent and equipment and defense products other than autos climbed a strong

Shipments of goods ordered earlier climbed 1.6 percent despite an 8.4-percent decline in auto industry that the ourchases would be divid-

Inventories continued to accumulate in September, up 0.4 per-cent to a value of \$260.9 billion, the fourth increase in five months. ■ House Sales Rise

lion in Brazil this year. "It looks like it's running at a third of that,"

The government's efforts to re-

duce imports and thus improve its

balance of trade also distresses

constant lobbying and negotiating

At Ford, and throughout the

biggest complaint is price controls.

With the country in the third year

shrunken to below their 1980 lev-

els, Brazil is a hard place to sell a

car. The Ford factories here have a

capacity to produce 220,000 a year.

This year, they will produce about

Despite the laggard sales, Mr.

Gerrity says higher prices would

Large Banks in Hong Kong Cut Prime

HONG KONG (Renters) — Hongkong & Shanghai Banking Corp.
and Chartered Bank said in a joint statement Wednesday that they cut the HONG KONG (Reuters) — Hongkong & Shanghai Banking Corp. and Chartered Bank said in a joint statement Wednesday, that they cut the prime, or base, lending rate by 1½ percentage points to 13½ percent. effective immediately. Deposit rates also were cut by about one point. The Hong Kong Association of Banks said the saving rate was cut by one point to 8 percent, while rates on 24-hour to two-week accounts were dropped to 8½ percent from 9½ percent, also effective immediately. Further cuts in Hong Kong interest rates could follow the next round of talks in Beijing on the British colony's future, scheduled for Nov. 14-bis and its board accepted the resignations. BMF advanced millions of dollars in loans to Hong kong property developers including the failed Carrian group. The exact amount advanced by BMF has not been disclosed.

Cold Fields Sets Pact With Newmont

LONDON (Reuters) — Consolidated Gold Fields PLC reached a 10-year agreement with Newmont Mining Corp. under which it can increase its ownership of Newmont to 33½ percent from the current 26 percent, and its limited Gold Fields chairman, Rudolph Agnew, told the annual meeting The new agreement replaces an October 1981 agreement that limited Gold Fields to a 26-percent interest in Newmont.

'Peanut' Charts New Computer Course for IBM

Compatible Machines Expected to Help Win \$100 Billion Sales a Year by 1990

computer giant.

In just two years, they say, the company has created an entirely ew line of compatible desktop omputers — each able to transfer Mormation freely with the other that IBM officials think will pro-

pel the company to annual sales of \$100 billion by 1990. The PCjr — or "Peanut," as it has long been known — was announced on Tuesday. It brings into the home for under \$700 a machine that can prepare data for further analysis on the rest of the compamy's more powerful line of office

The whole company has been fundamentally redirected," said Thomas J. Crotty, vice president of research for Gartner Group. 2
Stamford, Connecticut, research firm that follows IBM closely. "It's computer, a machine that has take the computer of the new IBM computer, a machine that has take the computer of the new IBM computer of the living room.

the company was being sued on frame. charges of anti-competitive activi-ty, including predatory pricing, the computer market, IBM has shed

perts and competitors of International Business Machines Corp.
agree that the PCjr (pronounced that, by announcing the PCjr on PC Junior) is the latest element of a Tuesday, even though it will not be undamental change in marketing available until next year. IBM was trategy and product design for the apparently trying to freeze Christmas saies of competing models.

Analysis say the success of the whole new line of home and personal computers is far more impor-tant to IBM than their meager contribution to the company's revenues would indicate. While sales of IBM's Personal Computer will amount to about \$1 billion this year, the machine represents the cutting edge of an IBM effort to get

the biggest share of what analysts expect will be a \$90 billion market for microcomputers by 1992.

That is roughly equal to the projected market size for the huge maintenance with the projected market size for the size. mainframes that IBM has dominated since the dawn of the computer

not only that they want to be part en a leading role in the microcomof all markets, or be everyone's puter industry. About a quarter of computer maker." he said. "It's all the personal computers over that they want to be everyone's \$1,000 sold this year were IBMs, information processor," whether and most analysts expect that the company will ship two million. their customers are in the office or company will ship two million the living room.

So it surprised few that IBM. "What is new about these ma-freed of the 13-year government chines." Mr. Crotty said, "is that all antitrust suit that drained its resources and dulled its competitive units." As IBM officials demonedge through the 1970s, is now ag- strated at Tuesday's introduction, a gressively moving to grab a tremen- business executive could prepare a dous share of its new markets. financial statement at home on a When asked Tuesday how many PCjr. then take the magnetic disk home computers the company on which it is stored to the office planned to sell, the PCjr's product for more sophisticated manipulamanager, Dave O'Connor, did not hesitate.

Should it be necessary, the infor-"We are going to sell as many of mation could be transferred in-these things as we can possibly stantly to a more sophisticated make," he said. In years past, when IBM machine, including a main-

independent business unit set up by the company. Other "IBUs," free of IBM's bureaucracy, have been set up to find new niches for

the company in telecommunica-The home computer industry has been characterized by severe pricecutting, which helped lead to last week's announcement by Texas Inlittle more than play games.

BOOKS

THE KINCDOM BY THE SEA: A Journey Around Great Britain

By Paul Theroux. 353 pp. \$16.95. Houghton Mifflin, 1 Beacon St., Boston, Mass. 02108.

Reviewed by Christopher Lehmann-Haupt

46 THERE is an English dream of a warm summer evening on a branch-line train," writes the novelist and travel writer Paul Theronx in one of the many evocative passages in "The Kingdom by the Sea: A Journey Around Great Britain."

"Just that sentence," Theroux continues," can make an English person over 40 fall silent with the memory of what has now become a golden fantasy of an idealized England: the comfortable dusty coaches rolling through the low woods; the sun gilding the green leaves and striking through the carriage windows; the breeze tickling the hot flowers in the fields; birdsong and the thimp of the powerful locomotive; the pleasant creak of the wood paneling on the coach; the mingled smells of fresh grass and coal smoke; and the expectation of being met by someone very dear on the platform of a country station."

As a matter of fact, there are a lot of English dreams - dreams dreamt about England as well as dreams dreamt by the English. One of the many interesting points that Theroux makes during his journey concerns what makes England so hard to describe: "Much of it had been written about by great men, and the very mention of a place in a literary work tended to distort the place, for literature had the capacity to turn the plainest corner of England into a

So one of the challenges that confronted Theroux in writing about Britain was to penetrate the English dream and find the reality. Another was more practical - how to find a systematic route, for in "choosing a route, one was choosing a subject." And then a marvelous solution presented itself. He would travel around the entire coast clockwise, setting out from London to Margate; then proceeding south and west along the English Channel to Cornwall; then going north through Wales and Lancashire into Scotland, where he would catch the boat train to Ulster and more or less circle the borders of Northern Ireland (this was cheating a little, because there wasn't exactly a seacoast); then returning to Scotland and going north to Cape Wrath, east to Thurso, theast to Aberdeen and then down the east coast of Scotland and England to complete his journey at Southend.

The route was orderly. It would show him every aspect of Britain. And it was not just a nick, for, as he writes, "a country tended to seep to its coast: it was concentrated there, deposited against its beaches like the tidewrack from the sea. People naturally gravitated to the coast, and they wore fewer clothes there -- it was normal on the coast to be seminaked.

Still, it may sound monotonous to read about the three-month trip that Theroux final-

ly made in 1981 by rail, wheel, foot and th After all, a coast is a coast; there's the sea the land and the people doing whatever the along a coast. Yet just as the author found "Every British bulge is different and every has its own mood," a reader is continu surprised by what Theroux turns up alons

He copies down unusual graffiti; "W ought to be hit about the head with the utr severity," he read at St. Ives Station. thumbnails every sort of unusual character encountered, from the female tramp in Liv pool who asked him to pull her heavy cart fo bit, to a young man named Fuggle who to him that he'd once dyed his hair purple "aubergine, actually" — to draw attention the fact that "deep down . . . I'm just not lil other blokes."

He records all manner of amusing and re vealing dialogues he overheard: Vitchett (on : train): "If you could change any feature of your body, what would you change?" Irby: "Me fice." Vitchett: "Your 'ole fice?" Irby: "Yeah. Me 'ole fice." (One of Theroux's many clever devices is early on to announce his talent at guessing approximately what people's names are. So, for the remainder of the book, you never know whether the ones he uses are real or "guessed.")

The book is filled with history, insights, landscape, epiphanies, meditations, celebrations and laments. Along the coast of Dorset, Theroux keeps wondering at the mumber of old people sitting in their cars and staring out to sea. He then recalls a passage written by Elias Canetti on the symbolism of the sea, and decides that to the English the sea "was not only a comfort, representing visor and comonly a comfort, representing vigor and com-fort. It was an end, too. Those people were looking in the direction of death." Reflecting on bow badly managed and rundown were all the large hotels at which he stayed, he con-cludes that "the English were not naturally corporate people." They "do small things well and big things badly." That, in part, accounted for the country's decline.

This is the depressing aspect of reading "The Kingdom by the Sea." Almost everywhere Theroux went along the coast, he saw powerty, unemployment, retreachment. The great branch railway system — the machine that had been set down in the garden and left it undefiled — was shutting down. You could no longer "get there from here." England was reverting to its pre-industrial condition and the people seemed to lack the energy or will to do anything about it.

Reading "The Kingdom by the Sea" has many compensations, both practical and inspirational. Therour's evocation of northern Scotland is breathtaking. Following his entire route with a good atlas—the book's endpaper maps are unsatisfactory — is an ideal way to get much of Great Britain's geography straight in one's mind. But a reader isn't left with much desire to follow the author's route. On the whole, one prefers to go on dreaming the

The 'Papa Bear' Progenitor of Pro Football

NEW YORK - He was 82 then, still at Chicago Bears. George Halas was talking in 1977 about Walter Payton, the most recent of the famous running backs in the Bears' history — which was also their owner's history.

Payton had rushed the previous Sunday for 275 yards, still the one-game record in the National Football League, and now the Bears were awaiting a Thanksgiving Day game in Detroit.

"That's the great thing about pro football, something like what Walter did Sun-day you usually enjoy for a whole week," Halas was saying. "But not this time, damp it. I wish we

weren't playing the Lions so quick, so we could savor what Walter did a little long-Until his death Monday night, Halas

savored pro football longer than anybody else. He also suggested it, shaped it and When the league that would develop into

the NFL was formed in Canton, Ohio, on Sept. 17, 1920, Halas was there in Ralph Hay's Hupmobile showroom at the first meeting of organizers from 12 Midwestern

He was representing the Decatur (Illi-nois) Staleys, who would move to Chicago in 1921 and a year later be baptized as the

"We only had two chairs at that meeting," he often said. "Everybody else sat on the runningboards or the fenders." In the beginning, Halas was a rare triple threat -owner, coach and, as right end on offense and defense, captain.

By the time the Papa Bear stopped coaching at age 73, his record, including playoff games, over four separate 10-year tenures was 326-150-31 (.673) and the Bears had won eight NFL titles. Only the Green Bay Packers, with 11, have won

Halas had the personality of the pioneer he was - not only tough but crusty, not only a successful coach but a successful businessman, not only a Chicago institution but also one of its museums, not only a At the Pro Football Hall of Fame in

Canton, he once stared beyond his bronzed bust at a photo in which he was growling at "I don't know what I was talking about,"

he said. "But I'm sure I was right." Halas also gave professional baseball a

kees in 1919. He went to bat against the to the Philadelphia Eagles in 1979. his desk six days a week as the owner of the great Rube Marquard of the Brooklyn

> hip sliding into third base. He played in only 19 games with the Yankees after that, batted .091, retired with a damaged hip and, he observed later, was "replaced" in right field by Babe Ruth. When he decided to leave the sidelines after the 1968 season, Halas blamed an arthritic hip that stemmed from that slide

nearly 50 years ealier. 'I knew it was time to stop coaching." he said. "I started to go after an official walk-ing along the sideline and I couldn't keep

Until illnesses hospitalized him in recent years, he enjoyed being recognized as he drove his blue Lincoln through the Chicago streets. At a red light once, a beer-truck driver velled over.

"Hey, Coach, you guys gonna win Sun-

We'll murder 'em," Halas said. "Attaway. Good seeing you, Coach." "Hey, pal, how about a free beer?"
Long after he stopped coaching, Halas remained Coach to everyone who knew him, especially other coaches.

"There is only man I embrace when we meet," the late Vince Lombardi once said. "and only one I call Coach."

Halas was 68 when he coached the Bears to their last NFL title in 1963, defeating the Giants, 14-10, at Wrigley Field in the

championship game. "There isn't room," he said the next day, "for many of these things in one lifetime. Considering his 88 years, George Halas

had more room than most people. His Bears also won the championship in 1946, 1943, 1941, 1940, 1933, 1932 and 1921. In 1940 they staged one of the most awesome performances in history by stomping the Washington Redskins, 73-0, for the league title.

The Washington owner, George Preston Marshall, had baited Chicago by ridiculing the Bears as "a bunch of crybabies." At halftime, Halas reminded his players of the taunt, and they added seven touchdowns to their 28-0 margin.

To people who complained that he had poured it on Halas replied:

"We used 33 men and the 33d scored a touchdown. Should I have rushed out and tackled him myself?"

But since the 1963 title, the Bears have qualified for the NFL playoffs only twice, and Grange "of the Chicago Bears" to

fling, trying out with the New York Yan- losing to the Dallas Cowboys in 1977 and

Because of the team's struggle, the Old Dodgers in spring training, hit a triple off Man. as Halas was known (not always the center-field fence and injured his right affectionately) in Chicago, was often critiaffectionately) in Chicago, was often criticized for having allowed the family franchise to deteriorate and for having been a Scrooge in paying his players.

During a contract dispute after the 1966 season. Mike Ditka, an all-pro tight end, described the Papa Bear's payroll philoso-

"He throws nickels around," Ditka said, "like they were manhole covers." Ditka soon was traded.

But when the Bears needed a new coach after the 1981 season, Halas hired Ditka. obviously offering him a salary with

Dick Butkus, an all-pro middle linebacker, also fended with Halas, filing a \$1.6 million suit in 1974 against the Bears for "irreparable damage" to his knees because of improper medical attention. Butkus eventually agreed to a settlement for a reported \$600,000, alienating Halas even

But when Butkus was elected to the Pro Football Hall of Fame in 1979, he chose Halas to be his presentor at his induction. The Papa Bear accepted, although illness kept him in Chicago.

Halas virtually created a private wing for the Bears at the Canton shrine. Of its 119 members, 19 in addition to Halas himself were established Bear players, more than any other team — Doug Atkins, George Blanda, Dick Butkus, George Connor, Paddy Driscoll, Danny Fortmann, Bill George, Red Grange, Ed Healy, Bill Hewitt, Sid Luckman, Link Lyman, George McAfee, George Musso, Bronko Nagurski, Gale Sayers, Joe Styda-har, George Trafton and Bulldog Turner.

"Nagurski," the Papa Bear once said of the fullback of the 30s. "What a man!" Another of his favorites was Luckman, the quarterback who guided the rout of the Redskins in the 1940 championship game, thereby affirming the T-formation in the

"Luckman could do it all," the Papa Bear once declared. "Pass, run, kick, defend — and think." Grange, the all-America halfback from

Illinois, joined the Bears in 1925 for a lateseason barnstorming tour that attracted nearly 400,000 people to 18 games, and to the concept of pro football as well. But not everyone in the nation was

George Halas in 1966

Calvin Coolidge, the president smiled. "It's nice to meet you, gentlemen," the president said. "I've always enjoyed animal acts. But over nearly 64 seasons as the Bears' owner, Halas helped build the NFL into what is now a three-TV network circus. "I liked to win and I fought for every-

aware. When a senator introduced Halas thing in the book." Halas once said. and Grange "of the Chicago Bears" to "Nothing else mattered."

WASHINGTON — "Hi, Colo"You're not even warm. The prescrt leaders of this particular country are no more than thugs with curfews and death squads and they have no respect for human rights." "I got it You're going into El Salvador."

"We are in El Salvador. The government we're going to overthrow is a totalitarian regime that rules "I'd be too worried about your with an iron fist, has martial law safety. We have a mission to ac- and doesn't think twice about as-

> "Wait a minute. You're not going to attack the Philippines are YOU?

"You're in the wrong ocean. It's a Communist government steeped in Marxist philosophy, with conterrot for all democratic reforms."

"We have no intention of being bogged down in Poland, or any-place behind the Iron Curtsin."

"There are so many countries in the world that fit your description, it's hard to come up with just one. Let's see, we've eliminated all totalitarian governments we support because they're not Communist, and we've eliminated all the major Communist countries because militarily it's not feasible. I'm stumped. You have to give me another hint."

"Ask me if it's bigger than a breadbox. "I forgot that one. Is it bigger

than a breadbox?" "No, it isn't bigger than a bread-

"It's not bigger than a breadbox and it's a threat to the United States⁹¹

"It isn't a threat to the United States in itself, but it's a way of sending a message to Cuba and the Soviet Union not to mess around with us because we mean busi-

breadbox and the press can't even accompany the American troops

going in?"
"Now you're getting very warm.
Do you give up?" "What choice do I have? Where are you going with your para-

"I can't tell you. But if you go over to the Pentagon tomorrow power through force and wiped out they'll give you all the details, and to show we have nothing personal against the media, the coffee and doughnuts will be on the house."

The Last Shakers

By Milly McLean United Press Inter

ANTERBURY, New Hampshire - The quiet filting voice rises slightly as Eldress Bertha Lindsay, one of only eight remaining Shakers, takes exception to the suggestion her religion is dying.

"The religion is not going to die out, not the spirit of it anyway," she says firmly, her chin lifting a little.

Eldress Bertha and the trust that operates the 600-acre (240-hectare) Shaker Village are trying to make sure that won't happen. The Shakers, a celibate Christian sect founded by breaksway Quakers in England

in the 18th century, got their name from their shaking, shouting, dancing rituals. They stopped taking new members in 1957. Declining interest and a shortage of male leaders to train new converts prompted the decision.

Only eight official members remain: three women in Canterbury and five at Sabbathday

Even though membership has dwindled, the Shaker trust has launched a \$400,000 fund-raising campaign to maintain the New Hampshire village, which became a museum in 1969. The money will renovate nine of the 22 buildings, according to the trust's director, Richard Kathmann

Lake in Maine,

Fund raisers hope to convert a dairy building into a Shaker food restaurant, the syrup house into an exhibition of traditional food processing and the carriage house into a visi-

The simple, white clapboard buildings, with their peeling paint and crumbling foun-dations, may be a curiosity to tourists. But to Eldress Bertha, who has lived and worked in every one of them during her 86 years, they are a legacy of the austere, work-oriented life n encouraged.

"I want it to represent exactly as we lived

— just as if we had left the room for a little while and were going back," she said. Eldress Bertha is blind now, but recalls

details from 1938 as if they were yesterday. She remembers workshops where members made the simple slat-backed chairs, flat brooms and wooden boxes for which the Shakers became famous.

She recalls the "entertainments" young people staged in the meeting house when it wasn't used for prayer. The kitchen prompts memories of apple pie flavored with rose water, distilled from the flower garden.

She feels the buildings are consecrated because of the hard work the male "brothers" put into building them in the late 1700s and 1800s. "Even the stone walks were cut by hand, not by machinery," she said. Like hundreds of other Shakers, Eldress

Bertha came to the village as an orphan. Her older sister brought her at the age of 8. Since the religion dictates celibacy, new members were either converts or orphans who decided to join at age 21.

"I can always remember my first day here," said Eldress Bertha, who wears the plain white cap and simple dress of Shaker women. "My sister was leaving. I lay out in the middle of the road there and cried. Sister Gelina came along and she said, 'Don't cry, little girl. I'll be your sister.' There was such love, I felt I should return that in love for

other little girls." Eldress Bertha agrees the furniture and crafts developed by the Shakers will probably be the longest-lasting legacy.

The Shakers tried to do everything perfectly," she said. "They tried to put their religion into their work."

Maine Shakers have continued to take in new members. But the two eldresses in Canterbury, the religion's leaders, have refused to acknowledge them. Eldress Bertha said their church covenant stipulates that they must live

Shaker Eldress Bertha Lindsay

by the decisions of their elders, although she has regrets.

"I would have loved to have seen this home full of people," she said.

Interest has also increased in the village. Every year, about 20,000 people from the United States and around the world visit the backwoods of Canterbury to meet the eldresses and tour the grounds, according to the fund-raising director, Ellie Porter.

As Winter Nears, Great Blasket Island Reverts to the Seals

By Colin McIntyre

"You mean it's not bigger than a creadbox and the press can't even lead on the press can't even land, once the nearest inhabited part of Europe to the United States, is now the home of sea-birds

and seals.

Today only a handful of fishermen, and a French and German couple who have turned a cottage into a café and hostel for tourists, spend a few summer months here.

Great Blasket, three miles (five kilometers) off the westernmost tip of County Kerry, was probably ney, 72, gazing across the water and they lived off the salvage for first inhabited before the birth of separating Great Blasket from the months.

grew to about 160 people.

Emigration to the United States led to an exodus of able-bodied men and women, and older islanders found it increasingly hard to cope with the harsh life on the island, four miles long and one mile wide. They himg on grimly in a cluster of 30 stone cottages sheltering from the Atlantic gales that howl across the treeless island, but in 1956, the last of them were evac-

One former islander, John Car-

uated to the mainland.

Christ, but 17th-century settlers mainland, told how they caught founded a community here that mackerel and scale, grew wheat and But there was a constant flow of

stories that kept alive the island's myths and history and produced four 20th-century Irish writers, Peig Sayers, Michael o Gaoithin, Tomas o Crohan and Maurice O'Sullivan. Their simple tales were
